

Play any song. In any room. From anywhere.

Sonos is the first and only digital music system that lets you play all your digital music, all over your house—and control it all from the palm of your hand. Best of all, you don't need a PC in every room, a music server or a wireless network. Just a Sonos™ ZonePlayer and speakers in the rooms of your choice and a Sonos™ Controller in hand to access all your digital music, no matter where it's stored—on your PC, Mac or Network Attached Storage box.

With a Sonos™ Digital Music System you can:

- Simultaneously play the same song or different songs in as many rooms as you'd like — up to 32.
- Easily access your entire digital music collection with a full-color LCD screen and scroll wheel.
- Wirelessly control all your music and all your rooms—from anywhere with Sonosnet™.
- Enjoy great sound in every room.

Digital music in every room.

That's right, every room—from the bedroom to the backyard. Now, you can liberate the digital music that's stored on your PC, Mac or Network Attached Storage box and spread it all throughout your house.

The Sonos Digital Music System does more than just distribute and play music throughout your house. It amplifies it, too. With the ZonePlayer's high-performance built-in amplifier, you can enjoy superior audio quality—low distortion and a high signal to noise ratio—in every room.

Sonos puts the control of all your music and all your rooms in the palm of your hand. With the Sonos Controller and Sonosnet™, our secure, wireless mesh network, you can instantly access your entire music collection from anywhere. No more running to your PC to turn on, change or turn off your music. No need for pointing or line of sight. Use one Controller for your entire house or several for added convenience.
